Intimnost kopalne kadi

S kopalno kadjo Kolpasan si v kopalnici ustvarimo naše svetišče za razvajanje in sprostitvev. Topla voda zmanjšuje stres, prebuja občutke, nas sprošča in vsesplošno vpliva na naše boljše počutje. V njem si ustvarimo naš osebni prostor v katerem se odmaknemo od zunanjega sveta, sprostimo in obnovimo naše notranje ravnovesje.

Bathtub intimacy

The Kolpasan bathtub helps us create our own sanctuary in the bathroom for pampering and relaxation. Warm water reduces stress, heightens senses, relaxes us and generally affects our well being. It becomes our personal space in which to escape from the outside world as well as unleash and restore our internal balance.

Intimnost kade za kupanje

S kadom za kupanje Kolpasan stvaramo naše svetišče za ugađanje i opuštanje u kupaonici. Topla voda smanjuje stres, budi osjećaje, opušta nas i općenito djeluje tako da se bolje osjećamo. U njoj stvaramo naš osobni prostor u kojem se izdvajamo od vanjskog svijeta, opuštamo i obnavljamo našu unutarnju ravnotežu.

Intimnost kade za kupanje

Sa kadom za kupanje Kolpasan stvaramo naše svetilište za ugođaj i opuštanje u kupatilu. Topla voda smanjuje stres, budi osećaje, opušta nas i uopšteno deluje na način da se bolje osećamo. U njoj stvaramo naš lični prostor gde se odvajamo od spoljnog sveta, opuštamo i obnavljamo našu unutrašnju ravnotežu.

Vodeni masažni sistem (pnevmatski)

Vodeni sistem za masažo (pnevmatski)

Vodni masažni sistem deluje tako, da vodna črpalka ustvarja pritisk ter pretok vode skozi masažne šobe. Te usmerjajo curek vode, pomešan z zrakom. Na tisoče zračnih kroglic z veliko hitrostjo vode intenzivno masira človeško telo. Z uravnavanjem dotoka zraka v masažno šobo prilagajamo moč masažnega curka.

This hydro massage system is based on pressure created by water pump directing water flow through massage jets as mixture of water and air. As a result, your body is being intensively massaged by thousands of extremely rapidly moving air bubbles. A regulation system allows controlling air and water flow through the massage jets.

Vodeni masažni sistem deluje na taj način da crpka za vodu stvara pritisak i protok vode kroz masažne mlaznice. Mlaznice umjeravaju mlaz vode izmiješane sa zrakom. Tisuće zračnih mjehurića nošenih velikom brzinom vode intenzivno masira tjelo. Regulacijom dotoka zraka u masažu mlaznicu regulira se snaga masažnoga mlaza.

Vodeni sistem za masažo deluje tako što pumpa za vodu stvara povišeni pritisk i protok vode kroz mlaznice za masažo. Mlaznice usmerjavajo mlaz vode pomešan sa vazduhom. Hiljade vazdušnih mehurića, nošenih velikom brzinom vode, intenzivno masirajo telo.

Funkcije sistema:

- vodna črpalka
- vodne šobe
- pnevmatski vklop
- regulator pretoka zraka min-max
- odlivno-prelivna garnitura
- podnožje kopalne kadi
- obloga kopalne kadi
- 6 vodnih mikro-šob s preklopnikom in močnejšo vodno črpalko
- 2 dodatni vodni mikro-šobi

System functions:

- water pump
- water jets
- pneumatic switch
- air flow regulator min-max
- overflow set
- bathtub support frame
- bathtub panel
- high performance waterpump, 6 microjets with switch
- 2 additional water microjets

Funkcije sistema:

- crpka za vodu
- vodene mlaznice
- pnevmatski prekidač
- regulator protoka zraka min-max
- odvodno-prelivna garnitura
- podnožje kade za kupanje
- obloga kadi za kupanje
- 6 vodenih mikro-mlaznica s preklopnikom i jačom vodenom crpkom
- 2 dodatne vodene mikro-mlaznice

Funkcije sistema:

- pumpa za vodu
- vodene mlaznice
- pnevmatski prekidač
- regulator protoka vazduha min-max
- odvodno-prelivna garnitura
- postolje kade
- obloga kade za kupanje
- 6 vodenih mikro-mlaznica za vodu sa preklopnikom i jačom vodenom pumpom
- 2 dodatne vodene mikro-mlaznice

V ta sistem so vgrajeni vsi elementi vodnega in zračnega masažnega sistema. Medsebojno učinkovanje obeh sistemov intenzivno deluje na človeški organizem, ga popolnoma regenerira in sprosti. Zračni masažni sistem deluje tako, da zračna črpalka ustvarja pretok stisnjene zraka skozi zračne šobe.

Te zrak razbijajo v drobne zračne kroglice, ki se mešajo z vodo. S svojo kinetično energijo masirajo človeško telo.

This system combines both water and air massage systems. Their interacting effect does great work for human organism with pure relaxation and a complete regeneration as a result. The air massage system is based on the air pressure generated by an air pump. The strong flow of compressed air running through the air nozzles results in millions of tiny air bubbles mixing with water and moving at high speed. It is their kinetic energy which provides massage to your body.

U taj su sistem ugrađeni svi elementi vodenog i zračnog masažnog sistema. Sinergija učinaka obaju sistema intenzivno djeluje na ljudski organizam, regenerira ga i opušta. Zračni masažni sistem djeluje na taj način da zračna crpka stvara protok komprimiranog zraka kroz zračne mlaznice.

Mlaznice razbijaju zrak u sitne zračne mjehuriće, koji se miješaju s vodom te svojom kinetičkom energijom intenzivno masiraju tijelo.

U kombinovani sistem ugrađeni su svi elementi vodenog i vazdušnog sistema za masažu. Istovremena aktivnost oba sistema intenzivno delujena ljudski organizam, u potpunosti ga regeneriše i opušta. Vazdušni sistem za masažu deluje takošto pumpa za vazduh stvara povišeni pritisak i protok vazduha kroz mlaznice za masažu.

Mlaznice razbijaju vazduh u sitne mehuriće koji se mešaju sa vodom, te svojom kinetičkom energijom intenzivno masiraju telo.

Funkcije sistema:

- zračna črpalka
- vodna črpalka
- super vodne šobe
- zračne šobe
- elektronski vklop za vodno in zračno črpalke
- regulator pretoka zraka min-max
- elektronska regulacija števila obratov zračne črpalke
- senzor za nivo vode
- odlivno-prelivna garnitura
- podnožje kopalne kadi
- obloga kopalne kadi
- 6 vodnih mikro-šob s preklopnikom in močnejšo vodno črpalke
- 2 dodatni vodni mikro-šobi

System functions:

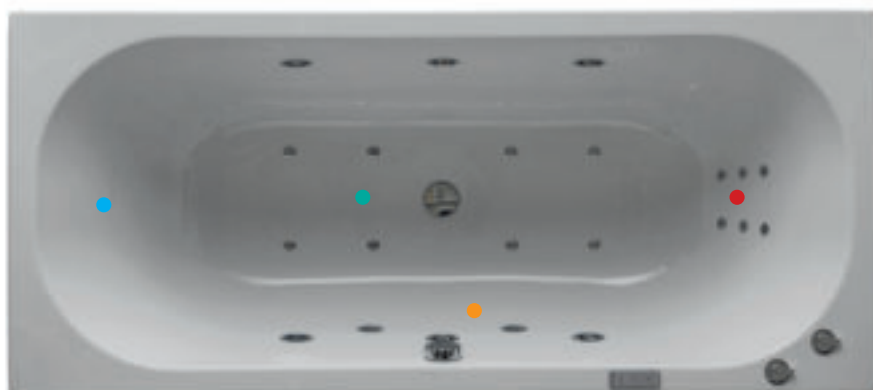

- air pump
- water pump
- super water jets
- air jets
- electronic switch for water and air pumps
- air flow regulator min-max
- electronic regulation of the air pump rpm
